

Wire Harness

**Wire Harness Design and Manufacturing
for Military and Aerospace Industry**

Wire Harness

**Electrical Wire
Harnesses Installations**

- **Aerospace, Military, and Commercial Programs**
- **Ground Applications**
- **Electrical Panel and Box Assemblies**
- **Electrical Wiring Harness Assemblies**
- **Design and Production Engineering**
- **Turnkey Projects**

Stark Aerospace has a fully integrated plant outfitted with innovative tools and equipment to keep us on the cutting edge of production capabilities. Some of our capabilities include: cable assemblies, electrical wire harnesses, electrical panels, circuit breaker panels, solder and crimp applications, customer labeling and wire cutting . Due to our state-of-the-art facility and skilled workforce, all of your wiring needs can be implemented in one location.

Electrical Panels

Stark uses an advanced program to assist with wiring and custom harness design. Developed by our parent company, the HarneSYS system provides block and wiring diagrams, harness layout drawings, and foam board drawings.

MK Tester

We have a wide range of advanced equipment and test systems, including Laser marking, braiding machines, and electrical testing machines. Our braiding machines are comprised of 48, 32, and 24 carrier machines and for applying metallic, such as copper and Nomex.

Our Services

- **Design**
- **Laser Marking**
- **Electrical Harness Production**
- **Prototyping**
- **Panel and Box Builds**

Our Advantages

- **On-Time Delivery**
- **Experienced Workforce**
- **AS9100/ISO9001 Certified**
- **IPC/J-Std Soldering Certified**
- **Customer Responsiveness**
